

Dear Students

Welcome to the Principles of Chemical Reactivity course.

My name is Marek Włodarczyk and I will be your instructor for this course.

Chem 2110 course will introduce you to the concepts directly related to the chemical structure and reactivity of organic molecules. The newly acquired knowledge will provide you with the solid background necessary to succeed in more advanced organic chemistry, biochemistry, and biology courses.

Our first class will be on **Wednesday, August 25th at 2:00 PM** room 327NE. We will meet afterward every Wednesday at the same time. Please refer to the syllabus.

Please remember that all our meetings will be carried in person on campus. Therefore, make sure you comply with all Brooklyn College Vaccination/COVID-19 testing requirements.

Specifically:

- Have your CUNY ID (card or digital)
- Complete VaxPass verification (don't wait till last moment)
- Remember about mandatory face mask

Also, review lecture notes and materials in advance. (on Blackboard)

Do not come to Campus if you experience any symptoms related to COVID-19, or you were in contact with infected individuals within the last week.

Double-check the latest entry points to the Campus before arrival. Currently, three entry points are permitted:

First through	Whitehead Building by Campus Road
Second through	Roosevelt Building by Bedford Avenue
Third through	Avenue H

I'm very excited about the incoming semester. I'm looking forward to seeing you on the first day of classes.

All the best

Marek Włodarczyk.
