

# Hazardous Waste Satellite Accumulation Area

The waste area must be identified by a sign.

## HAZARDOUS WASTE SATELLITE ACCUMULATION AREA

DURING ACCUMULATION EACH WASTE CONTAINER MUST:

Containers must remain closed when not in use.

Waste must be properly segregated according to compatibility.

## REMEMBER!

1. The waste area must be under the control of a person responsible for process that generates the waste.
2. All full chemical waste bottles must be dated and removed from the SAA within **3 days**.
3. The waste accumulation area must be located "at or near" the point of the waste's generation

Chemical waste must be clearly segregated from chemical stock.

### Hazardous Waste Label Requirements

1. The label must say "hazardous waste".
2. Constituents must be written with full chemical names (**no abbreviations**).
3. Waste containers must be dated and removed within **3 days** after being filled.

Waste must be stored in secondary containment to prevent uncontrolled spills
