Jefferson -- Jefferson the scientist and natural historian, the less-familiar Jefferson of “Notes on the State of Virginia” -- has a great deal to teach us about the Internet and its law. Jefferson’s search for the natural laws of size and scale -- epitomized by the moose that he had shipped to Paris while serving as US Ambassador to France -- helped him unlock some important secrets about human society, and about the nature and the design of human institutions, and the moose sent a message to the Old World that we would do well to heed today.

David Post is currently the I. Herman Stern Professor of Law at the Beasley School of Law at Temple University, where he teaches intellectual property law and the law of cyberspace. He is also a Fellow at the Center for Democracy and Technology, a Fellow at the Institute for Information Law and Policy at New York Law School, an Adjunct Scholar at the Cato Institute, and a contributor to the influential Volokh Conspiracy blog. Post is the author of In Search of Jefferson’s Moose: Notes on the State of Cyberspace (Oxford, 2009), a Jeffersonian view of Internet law and policy, and was a Green Bag Award Winner for “Exemplary Legal Writing – 2009.” He is also the co-author of Cyberlaw: Problems of Policy and Jurisprudence in the Information Age (West, 2007) (with Paul Schiff Berman, Patricia Bellia, and Brett Frischmann), and numerous scholarly articles on intellectual property, the law of cyberspace, and complexity theory. He has been a regular columnist for the American Lawyer and InformationWeek, a commentator on the Lehrer News Hour, Court TV’s Supreme Court Preview, NPR’s All Things Considered, BBC’s World, and recently was featured in the PBS documentary The Supreme Court. Post’s writings can be accessed online at davidpost.com

Thursday, November 4, 2010
12:30 p.m. to 2:00 p.m.
The Multipurpose Room
Brooklyn College Library, Room 411
