~~**Rationale:** Accredited nutrition programs in the United States have an unusually large number of required courses in order to meet the learning outcomes set by the accrediting body. A review of 46 programs across the country revealed that 98% had 3-credit introductory nutrition courses. Non-fieldwork courses should be standardized to provide 3 credits, and courses with fieldwork will provide additional credits to cover that component of the course.~~

~~**Date of Departmental Approval:** May 1, 2012.~~

~~**Effective Date:** Fall 2012.~~
