Prerequisites: CHEM 3410 or CHEM 3415W and PHY 2100 or 2150

Instructor: Professor Brian R. Gibney 2411 Ingersoll  
(718) 951-5600 x6636 bgibney@brooklyn.cuny.edu

Scheduled Lectures: T/TH 6:30 – 7:20 pm (432 NE)  
Scheduled Labs: T/TH 7:30 – 10:20 pm (443 NE)

Office Hours: Th 5:00 – 6:00 pm

Course Website http://www.hemeprotein.info/Chem3420/Chem3420.php (case sensitive)

Course Goals: Scientists from all disciplines rely on increasingly sophisticated instrumentation to perform detailed chemical analyses of samples. This course will provide you with both theoretical and practical instruction on the fundamental principles behind most of the common instrumentation used for chemical analyses. Through both lecture and laboratory instruction, you will become proficient in how each instrument is designed, how each collects and processes analytical signals, and how to evaluate the quality and reliability of the data collected. This knowledge will aid you in assessing experimental data, make you more adept at designing critical experiments, and will serve as your foundation for future work involving instrumental techniques.

Assignments: Homework exercises from the text will be given and the solutions posted the following week. Homework is not collected or graded, however professionalism demands that you keep current with the homework and reading assignments. I am not here to spoon feed you exam information. The homework will serve as an indication as to the type and level of difficulty of the questions/problems that you will find on the exams.

Grading: There will be one quiz, two one-hour exams and one two-hour final examination. The quiz is worth 10% of your grade, each hour exam is worth 15% of your grade, the final is worth 20% of your grade and the remaining 40% is made up from your laboratory reports. You must pass the lecture portion of the course to pass the course. The final grade may be curved.
• 90 -100%   A
• 80 -89%    B
• 70 -79%    C
• 60 -69%    D
• below 60%  F

As per department policy, any request for an examination regrade must be made in writing using the form available on the Department website.

Academic Honesty  Academic dishonesty will not be tolerated in any form. Evidence of cheating on exams, or copying of lab reports will result in a failing grade for the course, without exception. The CUNY policy on Academic Integrity can be found at:

http://www.cuny.edu/about/administration/offices/la/Academic_Integrity_Policy.pdf

Laboratory: Laboratory attendance is obligatory and you are strongly advised to be punctual and to maintain a laboratory notebook. Information on proper practice of a laboratory notebook will be distributed.

Course Topics:

Chapters 1-5  Measurement Basics
  DC Electronics
  AC Electronics
  Signals and Noise
  September 24, 2015  Quiz

Chapters 22-25  Electrochemical Methods
  Potentiometry
  Coulometry
  Voltammetry
  October 15, 2015  Exam I

Chapters 6-10  Spectroscopic Methods
  Atomic Absorption
  Atomic Emission

Chapters 13-16, 18
  UV-visible Absorption Spectrometry
  Luminescence Spectrometry
  Infrared Spectrometry
  Raman Spectrometry
  November 17, 2015  Exam II

Chapters 19-20
  Nuclear Magnetic Resonance Spectrometry
  Mass Spectrometry

Chapters 26-28, 30  Separation Techniques
  Gas Chromatography
  Liquid Chromatography
  December 10, 2015  Final Exam
