Brooklyn College Department of Chemistry

GENERAL CHEMISTRY IA, CHEM 1050 –Fall 2018

**Required Text:**  *Chemistry, The Central Science, Brown, LeMay, Bursten, Murphy, Woodward, Stolzfus, publisher--Pearson., 2017, 14th Edition (13th edition is also allowed)*

**Required Items:**  Scientific calculator: Texas Instrument TI-30X recommended.  
*Graphing calculators and internet devices are not allowed on exams!*

**Online Supplements and Info:**

www.brooklyn.cuny.edu/web/aca_naturalsciences_chemistry/Courses_Chem1050-Fall18-Syllabus.pdf  (online syllabus)

http://academic.brooklyn.cuny.edu/chem/howell/practice.htm  (old BC chemistry exams)

http://www.brooklyn.cuny.edu/web/academics/schools/naturalsciences/undergraduate/chemistry.php  (Chemistry Department Homepage)

http://www.brooklyn.cuny.edu/web/academics/honors/prehealth.php  (Pre-Health Professions website)

http://userhome.brooklyn.cuny.edu/mkobrak/labvideos.html  (Lab instruction videos)

**Counseling**  
*Coordinator for General Chemistry*  
Prof. Joann Mathias, 359NE  
jmathias@brooklyn.cuny.edu

*Undergraduate Chemistry Advisor:*  
Prof. Mariana Torrente  
Mariana.Torrente@brooklyn.cuny.edu

*Health Profession Counseling:*  
Prof. Silbering 2231B  
silbering@brooklyn.cuny.edu
Lecturer Contact Information

Academic dishonesty is prohibited in the City University of New York.

Cheating, plagiarism, internet plagiarism and obtaining unfair advantages are violations of policies of academic integrity and are punishable by penalties, failing grades, suspension and expulsion. For more information about CUNY policy on academic integrity see http://www.brooklyn.cuny.edu/bc/policies/pdt7CUNY%20PolicyAcademicIntegrity.pdf

Student Disability Services

In order to receive disability-related academic accommodations students must first be registered with the Center for Student Disability Services. Students who have a documented disability or suspect they may have a disability are invited to set up an appointment with the Director of the Center for Student Disability Services, Ms. Valerie Stewart-Lovell at 718-951-5538. If you have already registered with the Center for Student Disability Services please provide your professor with the course accommodation form and discuss your specific accommodation with him/her.

LECTURE TESTS FOR DAY LECTURE:  Note that these are during common hours.

FIRST TEST:  Tuesday, October 16, 12:30 – 2:00 PM,

SECOND TEST: Tuesday, November 20, 12:30 – 2:00 PM,

NO Makeup exams are given for Lecture Tests. We mean it.

FINAL EXAM FOR DAY LECTURE:  FRIDAY, DECEMBER 14, 8:00 AM-10:00 AM
Your final grade will be determined as follows:

40% Two lecture tests
30% Quizzes: Dates to be determined by the lecturer
30% Final Exam

Drop/Add Dates:

August 26 Last day to drop a course with 0% liability (100% refund)
September 2 Last day to add a course;
September 2 Last day to drop a course with 25% liability.
September 5 Last day to submit a Pass/Fail elective application for Spring 2018
September 9 Last day to drop a course with 50% liability.
September 16 Last day to drop a course without a grade of “W”
September 16 Last day to drop a course with 75% liability.
September 17 Course withdrawal period begins. A grade of “W” is assigned to
students who officially withdraw from a course.
November 6 Last day to withdraw from a class with a grade of "W".

Pass-Fail Option: Details regarding taking courses on a pass/fail basis are given in the Brooklyn
College bulletin. Students interested in this option should read the bulletin carefully, as they may
not be eligible to do so; questions should be directed to the Registrar. However, note that the last
day to submit a request to take a course on a pass/fail basis is given in the calendar above.
Chem 1050 Assigned Reading

Below is the assigned reading and a corresponding set of homework problems. Your lecturer will give you guidance about where you are in the text and what to do to stay current with the reading. **Read the material at least once before the lecture**, and spend some time on the in-chapter problems to reinforce it. Unless noted otherwise, problems listed as Homework correspond to the end-of-chapter problems for the corresponding chapter. Answers to red problems are at the end of the Chapter. **If you are instructed to memorize something, the test will be written assuming you have done so.**

Homework is assigned but not graded. Quiz and examination questions will mostly be similar to those given in the text. You should do as many of these as possible.

Chemistry Careers In and Out of the Laboratory

A degree in chemistry opens doors to dozens of exciting and rewarding careers. Here are just a few possibilities.

- Get involved in product development, manufacturing, or quality control for companies producing anything from chemicals to pharmaceuticals to textiles.
- Go on to obtain a MS or PhD in chemistry, biochemistry, biotechnology, bioinformatics, pharmacology, or any other biomedical field, and take a leading role in medical research. Design and test new drugs and medical devices.
- Get involved in sales and marketing for chemical and pharmaceutical firms. Companies are always looking for people with a strong technical background to market their products, and will pay top dollar for them.
- Go into the field as an environmental chemist to study and protect the natural world.
- Use your skills in interesting and challenging ways, from evaluating risk for insurance firms to restoring artwork for museums.
- Work in law enforcement, in anything from forensic investigation to health and safety regulation. Or work inside the political process at a government agency to help formulate policy on scientific, medical and environmental issues.
- Pursue a career in patent law and help bring the next great scientific breakthrough to the market. Or work in the U.S. Patent and Trademark Office to insure that inventors’ rights are protected.

*From Chemical and Engineering News, June 2, 2014, p.28.
**From Chemical and Engineering News, September 1, 2014, p. 68.

Chemists do sometimes have to change jobs or make career choices, but their skills are always in demand. In 2009, the U.S. unemployment rate peaked at 10.1%; the rate for chemists and chemical engineers that year was 3.9%. (see S. L. Rovner, Chemical and Engineering News, Nov. 7, p. 34, 2011). A skilled chemist is a valuable commodity.

Salaries for chemists are high, but do not do justice to the excitement of the field. Science as it is practiced today is collaborative, and chemists have abundant opportunities to travel, to work with interesting people, and to present the results of their work in ways that have a profound influence on the world. Science will shape the world of the 21st century, and you have the chance to be part of that process.

For more information, see the department’s undergraduate advisor (contact information on the first page of this syllabus).
Medical School, the Chemistry Major, and You

**Fiction #1:** Being a chemistry major will hurt my chances for medical school, because the hard courses may lead to a lower GPA.

**Fact:** Students majoring in mathematics and the physical sciences (this includes Chemistry) have the highest medical school acceptance rate of any major:

<table>
<thead>
<tr>
<th>Primary Undergraduate Major</th>
<th>Acceptance Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mathematics and Physical Sciences (including Chemistry)</td>
<td>47%</td>
</tr>
<tr>
<td>Biology and Health Sciences</td>
<td>41%</td>
</tr>
<tr>
<td>Humanities and Social Sciences</td>
<td>44%</td>
</tr>
<tr>
<td>Other</td>
<td>42%</td>
</tr>
</tbody>
</table>

Based on data for the entering class of 2013, reported by the American Association of Medical Colleges
Table compiled from data available at https://www.aamc.org/

**Fiction #2:** Chemists have to take a lot of hard courses so they don’t have time to do volunteer work, research, and other activities that help with medical school applications.

**Fact:** A student who has completed his or her requirements for medical school can obtain a chemistry degree with as few as five additional courses. This leaves plenty of time for other activities.

**Fiction #3:** If I don’t get into medical school, I may be stuck working in a lab all day.

**Fact:** Chemists have enormous opportunities outside the lab. Chemical and pharmaceutical companies desperately need managers and salespeople with chemical knowledge, and will pay top dollar for them. Chemists also find work in finance, insurance, law, government and manufacturing. Take a look at the other side of this page, or come to the Chemistry Office and ask to see the “Careers in Chemistry” folder.

**Some other advantages of being a chemistry major:**

- Chemistry majors can receive credit for performing research work with a faculty mentor. This means the time you spend on research gets you closer to graduating and your research experience appears on your transcript.
- Chemistry majors get the skills they need to perform advanced laboratory work, so they can get better research positions, accomplish more and get stronger letters of recommendation from their mentors.
- Thanks to generous donations by alumni, the Department of Chemistry is able to give out more than $10,000 every year in fellowships, scholarships and awards. These are an aid to both the pocketbook and the resumé.
- Brooklyn College’s first Rhodes Scholar of the 21st Century is a Chemistry major.
