

# Summer 2018 Registration Information

---

Registration for the Summer 2018 semester will begin Tuesday, March 19<sup>th</sup>, 2018. ***In order to ensure that you get a seat in a class, it is extremely important that you register as soon as possible.*** There will be no set enrollment appointments. All continuing students will be able to register as soon as CUNYfirst opens up on the 19th. This applies to both undergraduate and graduate students. If you wait, you may find that the classes you want have been closed or cancelled due to low enrollment. Please register early! Overtallies will not be given.

**Classes offered during the summer are very intense, however with dedication; the motivated student has an opportunity to accumulate credits in a very short time.**

**IMPORTANT Notice: Due to the CIS Department switching to Java in Fall 2017, this summer will be the last time CISC 3130 Data structures will be taught in both C++ and Java. From this point on it will be taught only in Java.**

**It is highly recommended that majors see a Deputy Chair each semester to plan out their schedule for the next semester.**

You may meet with the advisors during their office hours or make an appointment via email.
