RESEARCH OPPORTUNITIES!

Join us to hear about various research opportunities, conducted by Professors here at Brooklyn College.

- **Murray Gross** - Murray Gross is a professor in the CISC department here in Brooklyn College. His research areas include; working on a Kibble Balance, CNC milling machine, performing the gadanken experiment, and much more.

- **Mim Nakarmi** - Mim Nakarmi is an associate physics professor at BC and a research student at Kansas State. Mim has done extensive research in the development of semiconductor materials, and has published over 50 papers.

- **Sophia N. Suarez** - Sophia Suarez is an associate professor at BC. Her research program focuses on the use of High-Pressure Nuclear Magnetic Resonance and AC Impedance Spectroscopies to study the ion and mass transport properties of electrolyte materials used in electrochemical devices.

JOIN US TO HEAR ABOUT RESEARCH HERE AT BROOKLYN COLLEGE!

WHERE:
INGERSOLL HALL
ROOM 2127

WHEN:
APRIL 11
12:15-1:30
