The right college will help you decide what is best for you and prepare you to succeed. Find that college by asking yourself some fundamental questions: Which school will help me discover and develop my talents? Which of the more than 4,000 public and private schools across the country will make me feel at home? Which school can lead me toward a prosperous career and a rewarding life?

At Brooklyn College, we answer these questions by providing the kind of scholastic and experiential opportunities that will help you define your future and thrive throughout your career. We are in Brooklyn, but the world is our classroom. Our programs will take you from the campus, to the city, across the nation, to locations around the world and to the offices of major corporations, organizations and government agencies. By giving you a strong academic foundation, coupled with real-world experiences, we will provide you with the flexibility to meet the challenges of our global economy.

This book illustrates what we will offer you and why our graduates prosper in whatever career they pursue.

WE ARE BROOKLYN
The School of Business

It takes knowledge, experience and confidence to succeed in the business world today.

Our School of Business will provide you with the tools to explore, recognize and seize financial opportunities. We teach our students how to manage professional relationships, create effective public policy, and uphold business ethics. Students study law, marketing strategies, global trends and organizational behavior. Coupled with strategic internships in leading industry firms, nonprofit alliances and government agencies, our graduates are exceptionally situated to start a prosperous career.

The equation is easy:
Experience + Critical Skills = Winning Business Acumen.

Accounting major Autumn Fiore ’12 with Hope Goldstein ’88, a partner at Mark, Paneth & Shron

“Of all the schools I applied to, Brooklyn College had what I wanted. Effective networking with our alumni has been one of the most important keys to my success because they sharpened my professionalism and prepared me for my career.”
— JEREMIAH MCGINLEY ’12, business management; Long Island real estate agent

Active alumni mentoring in all fields

Some of our successful alumni:
BRUCE CHIZEN ’78, president and CEO, Adobe Systems; JERRY MOSS ’57, co-founder, A&M Records;
DAN DIDIO ’83, executive editor, DC Comics; STEVE RIGGIO ’74, CEO, Barnes & Noble, Inc.; GINA TRAPANI ’98, founder, Lifehacker blog

#1 in New York and in the NATION’S TOP 5 for African Americans who earn accounting degrees
As part of our Jumpstart program, I teach preschoolers two times a week at a community day care center. It has given me the opportunity to not only practice my teaching skills but give back to the community."

— RIANNA MOUSTAPHIA ’13, early childhood education
According to a recent survey conducted by Georgetown University, the skills and talents uniquely developed by a degree in the humanities and social sciences are the most sought after in the marketplace today. The 12 departments and seven interdisciplinary programs that make up our School of Humanities and Social Sciences develop a student’s ability to be a strong writer and critical thinker and to swiftly adapt to the demands of emerging industries. Most of all, students graduate possessing a strategic understanding of global issues and cultural differences that are necessary to succeed on the global stage.

Receive the knowledge, aptitude and flexibility to play a significant role on the world stage.

More than 75% of executives consider 5 key skill areas when hiring: critical thinking, complex problem-solving, written and oral communication, and applied knowledge in real-world settings.

— 2013 Association of American Colleges and Universities (AAC&U) Report

51% of business leaders prefer to employ humanities and social science graduates for their excellent global perspective, analytical skills and writing abilities.

— 2013 American Academy of Arts and Sciences Congressional Report

In 2012, careers in speech-language pathology was ranked #27 out of the top 50 careers by CNNMoney.com, with 11% growth rate over next five years.

In 2012, careers in speech-language pathology was ranked #27 out of the top 50 careers by CNNMoney.com, with 11% growth rate over next five years.
The School of
NATURAL AND BEHAVIORAL SCIENCES

Each year our faculty scientists are awarded millions of dollars from foundations and government funding sources to pursue medical, pharmaceutical, environmental and technological research. This means students are taught and mentored by professors who are actively involved in today’s most important scientific initiatives. Current projects include constructing robots and other kinds of artificial intelligence for civilian and military applications, developing green chemistry components for cancer treatments, and studying ways to protect New York City’s wetlands and coastlines.

Best of all, students are given the opportunity to work across the school’s disciplines and encouraged to tap into the skills and knowledge found in other fields, which help develop distinctive insights and creative problem-solving abilities.

You will conduct the kind of research that leads to important scientific discoveries.

Science and resilience research at Jamaica Bay promotes the understanding of our urban ecosystem and its resilience and sustainability.

Our students receive funding from the National Institute of Science and the National Science Foundation.

“One of the most rewarding experiences was participating in the research of several faculty members and being given the opportunity to present the research at national conferences. It was exciting to be part of important research and speak about it outside the classroom.”

— ISABEL RODRIGUEZ ’12, psychology; full scholarship to University of Rochester’s graduate program in clinical psychology.
Students in our School of Visual, Media and Performing Arts are audacious, creative and ambitious. They find a tradition of excellence, supported by a faculty that has included some of the masters of the 20th century, such as painters Mark Rothko and Louise Bourgeois; actor F. Murray Abraham; performance artist Vito Acconci; and musicians Itzhak Perlman and Ursula Oppens. Our alumni are equally accomplished: actors James Franco ’10 M.F.A. and Sopranos cast members Dominic Chianese ’61 ("Uncle Junior") and Steve Schirippa ’80 ("Bobby Baccalieri"); artist Martha Rosler ’65 M.F.A.; graphic artist Ben Katchor ’75 M.F.A.; and radio host Leonard Lopate ’67.

Our students are given myriad opportunities to audition, perform and showcase their talents in the heart of New York City’s artistic community.

Be inspired to take your artistic talents to a new level of excellence.

From your first year, you will be part of a small group of students who are just like you — academically gifted, with ambition to succeed. Small class sizes ensure that you receive individual attention, personalized academic advisement, internship and scholarship opportunities, and mentorship from world-class faculty. Graduates from our honors programs go on to pursue advanced degrees and success in every career they choose.

Come with your intellectual curiosity. Graduate with unlimited potential.

THE HONORS ACADEMY

at Brooklyn College

THE SCHOLARS PROGRAM prepares you for distinguished participation in national and international intellectual activities.

THE COORDINATED B.A.-M.D. PROGRAM trains you to become a physician and lays the groundwork for acceptance into SUNY Downstate College of Medicine.

THE MELLON MAYS UNDERGRADUATE FELLOWSHIP helps minority students of great promise to become scholars of great distinction.

THE COORDINATED ENGINEERING HONORS PROGRAM provides a solid foundation for a career in chemical and biomolecular, civil, computer, electrical or mechanical engineering.

MAXIMIZING ACCESS TO RESEARCH CAREERS (MARC) offers faculty mentoring, research experience and a $10,000 annual stipend to help prepare academically gifted minority students interested in pursuing a graduate degree and a career in biomedical and behavioral research.

The William E. Macaulay Honors College provides high-achieving students at Brooklyn College (and other CUNY institutions) with superior educational opportunities, advisement and financial support. Membership in the honors college comes with a number of privileges. The full cost of your college tuition will be covered by a merit scholarship. You will not only take honors courses in your major, but you will also have the opportunity for a paid internship or funded travel for a study-abroad honors course. Your civic awareness will be cultivated through community service projects overseen by the program. Additionally, you will receive a personal laptop computer and a cultural passport that provides free or discounted tickets to a number of artistic and cultural institutions in New York City. The honors college gives you the resources you will need to excel.

“One of the factors that helped me succeed was the small classes and the personal attention I received. I was able to get a more in-depth understanding of the topics discussed in class through talking to my professors during their office hours.”

— BEN RUDSHTEYN ’13, chemistry; accepted to Ph.D. program in physical chemistry at Yale University
CASE programs include:

**the research initiative for scientific enhancement (RISE)** focuses on helping you obtain a career in scientific research.

**the collegiate science and technology entry program (CSTEP)** will guide you in enrolling in and completing undergraduate programs that lead to professional licenses and careers in math and science.

**the cuny-wide new york city louis stokes alliance for minority participation (NYC-LSAMP)** helps you to achieve a career related to science, technology, engineering or math.

We believe everyone deserves a first-rate education, no matter what their background or circumstances are. If you are a minority student interested in pursuing a career in the sciences, our Center for Achievement in Science Education (CASE) will ensure you receive a firm foundation through one-on-one faculty mentoring, research and internship opportunities, financial counseling and career workshops.

We will make sure you realize your full scientific potential.

**Center for Achievement in Science Education**

**Special Programs**

**Pre-professional Programs:**

**Medicine, Law, Health**

Our pre-professional programs in health and law will jump-start your career in the health care industry and the law. You will receive special academic advisement, research and internship opportunities, alumni networking and career resources, and professional school application assistance. Our goal is to make you the most qualified, confident and prepared candidate for admission to professional schools.

**Scholarships and Financial Aid**

Brooklyn College has one of the most affordable tuition rates in the country. In 2012, the Princeton Review ranked us as one of the best value colleges in the nation, praising both the cost and rigor of our world-class education. Yet, we realize that you may still require financial assistance.

Each year, we offer more than 600 scholarships, awards and prizes to eligible students, with well over $1 million in support. Additionally, there are a number of grants, loans and work-study program options that can help you manage the costs of the renowned education you will receive here.

For more information about financing your education, please call us at 718.951.5051, e-mail us at finaid@brooklyn.cuny.edu, or visit our website at www.brooklyn.cuny.edu/financialaid.

*Tuition and fees are subject to change without notice.*
Our Magner Career Center provides you with the kind of specialized consultations, training and access to alumni and corporate networks that will give you an edge in the job marketplace — whether locally, nationally or internationally. Our staff of career professionals are as interested in your success as you are and will help you to choose internships, create an impressive résumé and cover letter, and provide access to exclusive job listings.

Our goal is to prepare you for your career in an ever-changing global economy.

“**I had an internship at the American Museum of Natural History. I was studying the effects of freezing on teeth specimens. It was really cool because I got to use the scanning electron microscope and learn exactly how it’s used. You learn about it in school — what it does, how it works — but you never actually get to use it. So using this high-tech piece of machinery was amazing!”**

— JASMINE PATEL ’11, B.A.—M.D. and Macaulay Honors
Whether you want to explore the cultural heritage of China, study ballet in France, produce a film in India, participate in an archaeological dig in Israel, analyze global economics in Argentina, or conduct your own research in any country you can imagine, we can help you achieve your goal.

Our study abroad programs will give you a different perspective on your interests by exposing you to how people around the world live and think. Programs last anywhere from a few weeks to a full academic year, and the credits you earn count toward your degree. Our faculty will enhance your experience with introductions to the people and out-of-the-way sites.

What’s more, we offer numerous fellowships, scholarships and awards to help you manage the cost of your travel.

We’ll offer you an education without borders.

100 programs to choose from

“"My experience in Nepal will allow me to come away with a deeper understanding of global health and the tools to be a future health care leader.""

— DEVKI BHATT ’14, anthropology; applying for M.A. program in public health

5 popular destinations for our students: China, France, Israel, Italy and Spain
College is not just about what you learn in the classroom. It’s also discovering things about yourself, engaging in different activities, and meeting interesting people. No matter what your academic, artistic, athletic, cultural, political, social or spiritual interests, you’ll find something at Brooklyn College you’ll want to do, with people who share your passion.

Each Tuesday and Thursday, the campus bursts with activities. Our two quads are often taken over by one of our many registered clubs, Greek chapters or student gatherings. Meet up with friends at the Student Center to play video games or a round of pool, or just relax in the café. Head over to the West Quad Center to shoot a few hoops, pick up a game of volleyball, swim some laps in the pool, or work out in the fitness center.

Your world will expand beyond the classroom.

“...I met people from different cultures and with different lifestyles from mine, more than I ever thought I would. The more people I met on campus, the more comfortable I felt being myself.”

— Katherine Gibbons ’12, biology; now in a graduate program in marine biology, University of South Florida
Admission for transfer students is based on the strength of your previous college records and, in some cases, your high school record. Credit evaluation will take place after admission.

Apply online
Please visit [www.brooklyn.cuny.edu/apply](http://www.brooklyn.cuny.edu/apply).

Undergraduate Admission
To speak with an admissions representative, please call 718.951.5001 or visit [www.brooklyn.cuny.edu/admissions](http://www.brooklyn.cuny.edu/admissions).

Admissions
Admission to Brooklyn College is based on a variety of factors, including high school grades, academic program, and SAT or ACT scores. If you were educated outside of the United States, generally you will need the same credentials. Priority is given to those who apply early.

How do I apply to Brooklyn College?

Application Deadlines
February 1 – Fall
September 15 – Spring
Judaic studies professor Yaffa Eliach helped to create the United States Holocaust Memorial Museum’s Tower of Life.

Justin Davis ’12 is an actor on HBO’s Emmy Award–winning series Boardwalk Empire.

Students served 3,000 meals to Coney Island residents after Hurricane Sandy.

Thelma Parros ’48 was named the first African American New York City “Miss Subway.”

Wildlife on campus: 1 hawk, 1 falcon, 2 colonies of monk parakeets, 16 turtles and 1 massive school of goldfish.

Our famous boxing collection includes Muhammad Ali’s heavy bag and the trunks he wore to fight Leon Spinks.

200 fish from our Aquatic Research and Environmental Assessment center spent five days on the space station Mir.

8,000 tulip, daffodil and hyacinth bulbs are planted every spring.

A Mastodon’s tooth and leg are part of the paleontology lab’s holdings.

A rare stuffed duck-billed platypus is for the petting in the earth and environmental sciences department.

1950: first computer — an IBM punch card — was installed on campus.

1955: John Hope Franklin is appointed history chair — the first African American to head an academic department at a non-black college.

Alumnus Alex Coletti ’87 created and produced MTV Unplugged.

Some entertaining alumni: Mel Brooks, James Franco, Dominic Chianese (The Sopranos)

Students served 3,000 meals to Coney Island residents after Hurricane Sandy.
